Education

Parul University B.Tech in Computer Science & Engineering (CGPA: 8.24 / 10.00)	2019 – 2023
The Maharaja Sayajirao University of Baroda Diploma in Computer Engineering (75.13%)	2017 – 2020
Satyanarayan Vidyalaya 10th Class - GSEB Board (71.83%)	2017

Competitive Examinations

Graduate Aptitude Test in Engineering (GATE): Qualified GATE Computer Science (CS) 2026 with **79.64 Percentile**, GATE Data Science & AI (DA) 2026 with **73.07 Percentile**, and GATE Computer Science (CS) 2024 with **71.36 Percentile**.

Technical Skills

Languages: PHP, SQL, HTML5, CSS3, JavaScript, Java, Python, C, C++
Databases: MySQL (Query Optimization, Schema Design, Transaction Safety, Foreign Keys)
Web Technologies & Libraries: Bootstrap, jQuery, AJAX, PHPMailer, Dompdf, REST APIs
APIs & Services: Google OAuth 2.0, Firebase Authentication, Razorpay Checkout API, SMTP Services
Developer Tools: Git, GitHub, FileZilla FTP, Visual Studio Code

Projects

-
- | | |
|--|--------------------|
| Shram – Labour Hiring Marketplace
Live Demo Download Android App GitHub Code <ul style="list-style-type: none">Built a digital marketplace solving informal chowk-based hiring inefficiency, connecting workers across 7 trades with customers/builders via composite foreign keys.Developed a dynamic PHP backend validating state flags (pending, accepted, rejected) to process and monitor real-time hiring requests.Implemented an automated cascading dependent dropdown (State → City → Hotel) using jQuery AJAX, reducing form-filling friction.Integrated secure Multi-Factor Authentication via SMTP OTP and Firebase Google Sign-in to protect client registration.Programmed dynamic MySQL query optimizations to load real-time cart and favorites indicators across concurrent user sessions.Automated invoice generation (Dompdf) with synced SMTP delivery pipelines. | May 2022 – Present |
| Zaika – Virtual Restaurant & Food Ordering Platform
Live Demo Download Android App GitHub Code <ul style="list-style-type: none">Developed a virtual dining web portal supporting table reservations, real-time takeaway bookings, and order tracking.Integrated a digital NGO Food-Donation log, enabling the admin to allocate leftover restaurant meals to registered charities using metric parameters (kg, liters, pieces).Secured dine-in and takeaway checkouts via transaction verification and SMTP OTP email validation.Built a dynamic schema auto-generator to automatically synchronize MySQL database structures on deployment. | Jan 2021 – Present |
| Explore India – Travel & Tourism Portal
Live Demo Download Android App GitHub Code <ul style="list-style-type: none">Developed a responsive tourism web portal featuring custom itinerary builders, package filters, and transaction tracking.Programmed secure session verification with absolute token destruction on user logout.Engineered a visual flight seat reservation grid, implementing deterministic seeding via <code>srand(crc32(...))</code> to simulate persistent booked states without database storage overhead.Designed a randomized matching algorithm allocating tour packages to local guides in a strict 1-to-1 ratio, preventing duplicate scheduling. | Oct 2019 – Present |

Certifications & Publications

Publication: “Shram: A Practical Approach” — International Journal of Advanced Research in Engineering, Science & Management (IJARESM), Vol. 11, Issue 3, Mar 2023. [View Paper](#)

Certifications: **Google AI Fundamentals** (Google, Coursera, Issued: Jun 2026) | **Programming for Everybody - Python** (Univ. of Michigan, Coursera, Issued: Jun 2026)
